

Business Development Job Descriptions by Industries

Business Development — [Banking]

Purpose Business Development (BD) for banking drives strategic revenue growth by identifying high-value opportunities, creating tailored solutions for regulatory and security needs, and building partnerships that accelerate adoption of cloud, API, fraud, and payments modernization.

Core focus areas

- **Customer outcomes:** reduce migration risk, accelerate time-to-market, lower fraud losses, enable API monetization.
- **Go-to-market motions:** enterprise sales, pilot-to-scale, partner co-sell with SIs and cloud providers, and targeted ABM for top accounts.
- **Value drivers:** compliance readiness, data residency, proven PoC outcomes, TCO/ROI clarity, and executive sponsorship.

BD plan summary

- **Target ICP:** Regional and mid-tier banks with legacy cores, active digital programs, and security/compliance mandates.
- **Top offers:** 30–60 day fraud detection pilot; API gateway + developer portal; core modernization implementation with managed services.
- **Sales plays:** Compliance-first assessment → Architecture workshop → Pilot → Enterprise rollout.
- **KPIs:** Pipeline coverage 4x quota; win rate 20–30%; time-to-pilot <90 days; NRR >110%.

Sample Job Descriptions

Role	Primary responsibility	Key skills	Quota / KPI
VP Business Development Banking	Own vertical strategy, major accounts, partner ecosystem	Strategic sales, executive engagement, contract negotiation	New ARR target; partner-sourced revenue

Role	Primary responsibility	Key skills	Quota / KPI
Enterprise Account Executive	Close enterprise deals, run executive briefings, manage RFPs	Consultative selling, financial modeling, stakeholder mgmt	Quota attainment; average deal size
Solutions Architect	Design pilots, lead technical workshops, support PoCs	System architecture, security, integration patterns	Pilot success rate; time-to-deploy
Partner Manager	Recruit and enable SIs/MSPs, manage co-sell motions	Partner programs, enablement, channel sales	Partner pipeline; partner-sourced revenue
Customer Success Manager	Drive adoption, renewals, expansion	Onboarding, training, value realization	Renewal rate; expansion ARR

Discovery Script Banking

Purpose: qualify fit, surface constraints, and define pilot success metrics.

Duration: 20–30 minutes for executive; 45–60 minutes for technical.

Executive discovery (20 minutes)

- **Intro (1 min):** Purpose and agenda.
- **Business priorities (3 min):** What are your top 3 priorities this year?
- **Current initiatives (4 min):** Are you running core modernization, cloud migration, or open banking projects? Timelines?
- **Pain and impact (5 min):** What blockers exist (risk, compliance, vendor lock-in)? What is the business impact?
- **Decision process (4 min):** Who are decision-makers, procurement timelines, and budget range?
- **Next steps (3 min):** Propose architecture workshop or pilot; confirm stakeholders and data access.

Technical discovery (45 minutes)

- **Environment:** core vendor, middleware, cloud provider, data residency.
- **Integrations:** payment flows, APIs, batch jobs, message queues.

- **Security:** encryption, logging, audit, compliance requirements.
- **Data:** sample types, volumes, PII handling, retention.
- **Success metrics:** latency, fraud precision/recall, MTTR, throughput.
- **Constraints:** change windows, sandbox availability, procurement gating.
- **Acceptance:** define go/no-go criteria and timeline.

Pilot Template Banking

Pilot Title 30-Day Fraud Detection Pilot

Objective Demonstrate X% reduction in false positives and Y% faster detection for payment fraud within 30 days.

Scope

- **Data sources:** payment streams for last 90 days (anonymized); transaction metadata.
- **Integrations:** ingest via API or secure SFTP; real-time stream optional.
- **Deliverables:** deployed model in sandbox, dashboard with KPIs, weekly progress reports, final results and recommendations.

Success Criteria

- **Primary:** false positive rate reduced by $\geq X\%$ or detection precision improved by $\geq Y\%$.
- **Secondary:** processing latency $< Z$ ms; integration completed within 10 business days.

Timeline

- **Week 0:** Kickoff, data access, roles confirmed.
- **Week 1:** Data ingestion and baseline metrics.
- **Week 2:** Model tuning and initial results.
- **Week 3:** Integration validation and dashboarding.
- **Week 4:** Final evaluation, handoff plan, and commercial proposal.

Roles & Responsibilities

- **Customer:** provide data access, sandbox, SME availability.
- **Vendor:** deliver model, run tests, provide weekly demos.
- **Joint:** define acceptance and sign pilot SOW.

Commercials Fixed pilot fee or discounted pilot with conversion credit toward first year subscription.

Negotiation Checklist Banking

Pre-negotiation

- **Confirm objectives:** agreed pilot success metrics and business case.
- **Stakeholders:** list legal, procurement, security, and business approvers.
- **Referenceability:** agree on reference use and confidentiality.

Commercial terms

- **Pricing model:** subscription, implementation fees, outcome milestones.
- **Pilot conversion:** credit terms if pilot converts to paid contract.
- **Discounts:** volume, multi-year, strategic reference discounts.

Legal and compliance

- **Data protection:** DPA, data residency, encryption, breach notification.
- **IP and licensing:** ownership of models, derivative works, and customizations.
- **Liability and indemnities:** caps, exclusions, and insurance requirements.

Operational SLAs

- **Uptime and support:** response times, escalation path, maintenance windows.

- **Change management:** deployment windows, rollback procedures.
- **Exit and migration:** data export, transition assistance, and termination terms.

Approval and signoff

- **Procurement checklist:** PO process, invoicing, payment terms.
- **Executive signoff:** confirm sponsor approval and go-live conditions.
- **Post-contract plan:** onboarding schedule, CSM assignment, QBR cadence.

Business Development — [Insurance]

Purpose Drive revenue by delivering insurtech solutions that automate claims, improve underwriting with analytics, and enhance customer experience while meeting regulatory requirements.

Core focus areas

- Claims automation and straight-through processing
- Predictive underwriting and risk scoring
- Digital distribution and broker portals
- Regulatory reporting and compliance automation

BD plan summary

- **ICP:** Mid to large insurers with legacy claims systems, active digital transformation, and appetite for AI/analytics.
- **Top offers:** 60-day claims automation pilot; underwriting analytics PoC; broker portal MVP.
- **Sales plays:** Claims pilot → measurable cycle time reduction → enterprise rollout; partner with MGAs and brokers for distribution.
- **KPIs:** Pipeline coverage 3–4x quota; pilot conversion rate 40%; time-to-pilot <60 days.

Sample BD job descriptions

- **VP BD Insurance:** Vertical strategy, enterprise deals, partner ecosystem. Skills: insurance domain, regulatory knowledge, executive selling. KPI: new ARR, partner revenue.
- **Enterprise AE:** Close deals, manage RFPs. Skills: consultative selling, ROI modeling. KPI: quota attainment.
- **Solutions Architect:** Design integrations with policy and claims systems. Skills: APIs, data modeling. KPI: pilot success rate.
- **Partner Manager:** Onboard MGAs, brokers, ISVs. Skills: channel programs. KPI: partner-sourced pipeline.
- **CSM:** Drive adoption, renewals. Skills: onboarding, training. KPI: renewal rate.

Discovery script

- **Executive (20 min):** priorities; current claims/underwriting initiatives; KPIs for claims cycle time and loss ratio; decision makers; budget/timeline.
- **Technical (45 min):** core policy/claims systems; data formats; integration points; compliance needs; sample data availability; success metrics.

Pilot template

- **Title:** 60-Day Claims Automation Pilot
- **Objective:** Reduce manual touchpoints by X% and cycle time by Y%.
- **Scope:** Ingest claims data for defined product lines; automate triage and routing; dashboard.
- **Success criteria:** X% reduction in manual reviews; Y% faster settlement.
- **Timeline:** Week 0 kickoff → Week 1 data ingest → Week 2–4 model tuning → Week 5 validation → Week 6 final report.
- **Commercials:** Fixed pilot fee or discounted with conversion credit.

Negotiation checklist

- Confirm pilot KPIs and acceptance criteria.
- Data protection and regulatory clauses (PII, retention).
- IP and model ownership.

- **Solutions Architect:** Lab demos, interoperability tests. Skills: network protocols, orchestration. KPI: demo success rate.
- **Partner Manager:** Telco integrators and OEMs. Skills: channel enablement. KPI: partner pipeline.
- **CSM:** Service adoption, SLA compliance. KPI: NPS, renewal.

Discovery script

- **Executive (20 min):** 5G/IoT priorities; revenue targets for new services; procurement timelines.
- **Technical (60 min):** current OSS/BSS stack; orchestration tools; APIs; lab/test environment; performance targets.

Pilot template

- **Title:** 90-Day OSS/BSS Modernization Pilot
- **Objective:** Demonstrate automated order-to-cash and reduced provisioning time by X%.
- **Scope:** Integrate with billing and provisioning for a defined service; automation workflows; KPI dashboard.
- **Success criteria:** X% reduction in provisioning time; Y% fewer manual interventions.
- **Timeline:** Week 0 kickoff → Week 1–3 integration → Week 4–8 automation tuning → Week 9–12 validation.
- **Commercials:** Fixed fee; conversion credit.

Negotiation checklist

- Confirm lab/demo acceptance criteria.
- Interoperability and testing windows.
- Data handling and network security clauses.
- Commercial model: pilot credit, multi-year pricing, revenue share for monetized services.
- SLAs for orchestration and uptime.
- Escrow, IP, and migration assistance.

+++++

Business Development — [IT Service Management ITSM]

Purpose Grow revenue by selling ITSM automation, observability, and SRE enablement solutions that reduce incident MTTR, improve service quality, and lower operational costs.

Core focus areas

- Incident automation and runbook automation
- CMDB and service mapping integrations
- Observability and SRE tooling
- Managed IT operations and co-managed services

BD plan summary

- **ICP:** Enterprises and mid-market IT organizations with mature IT operations seeking automation and SRE practices.
- **Top offers:** 30-day incident automation pilot; CMDB integration PoC; managed services retainer.
- **Sales plays:** Rapid pilot → measurable MTTR improvement → subscription + managed services.
- **KPIs:** Pilot conversion 50%; time-to-pilot <30 days; NRR >110%.

Sample BD job descriptions

- **Head of BD ITSM:** Vertical strategy, partnerships with MSPs. Skills: ITIL/SRE knowledge. KPI: managed services ARR.
- **AE ITSM:** Close mid-market and enterprise deals. Skills: product demos, ROI modeling. KPI: quota.
- **Solutions Architect:** Map service topology, design automations. Skills: CMDB, observability. KPI: pilot success.
- **Partner Manager:** MSP and tooling partners. KPI: partner pipeline.
- **CSM:** Adoption, runbook optimization. KPI: reduction in MTTR.

Discovery script

- **Executive (15–20 min):** top operational pain points; MTTR targets; current tooling and automation maturity.
- **Technical (45 min):** incident workflows, CMDB state, observability stack, data retention, integration points, success metrics.

Pilot template

- **Title:** 30-Day Incident Automation Pilot
- **Objective:** Reduce MTTR by X% for top incident types.
- **Scope:** Automate top 3 incident playbooks; integrate with ticketing and monitoring; dashboard.
- **Success criteria:** X% MTTR reduction; Y% automation rate.
- **Timeline:** Week 0 kickoff → Week 1 mapping → Week 2 automation build → Week 3 testing → Week 4 validation.
- **Commercials:** Low fixed fee; conversion credit.

Negotiation checklist

- Define incident types and acceptance metrics.
- Data access and logging retention.
- Support SLAs and escalation.
- Pricing: subscription, per-incident, or managed retainer.
- IP for custom runbooks and ownership.
- Exit and knowledge transfer.

+++++

Business Development — [SMEs]

Purpose Acquire and scale SME customers with packaged cloud, security, and productivity solutions that are affordable, fast to deploy, and easy to manage.

Core focus areas

- Managed cloud and backup bundles
- Basic cybersecurity and compliance packages
- Productivity and collaboration toolkits
- Affordable support and onboarding services

BD plan summary

- **ICP:** SMEs 10–250 employees with limited IT staff, budget sensitivity, and need for fast onboarding.
- **Top offers:** 30-day security health check; managed cloud starter bundle; per-user SaaS packages.
- **Sales plays:** Digital marketing → self-serve trials → inside sales conversion → onboarding package.
- **KPIs:** CAC, conversion rate from trial, time-to-onboard <7 days, churn <5% annually.

Sample BD job descriptions

- **Head of SMB Sales:** GTM for SME segment, channel partnerships. KPI: new customers, CAC.
- **Inside Sales Rep:** High-volume outreach and demos. KPI: meetings, conversion.
- **Solutions Engineer:** Onboarding and technical setup. KPI: time-to-onboard.
- **Partner Manager:** MSP and reseller network. KPI: partner referrals.
- **CSM:** Retention and upsell. KPI: churn, expansion.

Discovery script

- **Short discovery (15 min):** business priorities, current IT stack, pain points, budget, timeline, decision maker.

- Integrations with HRIS and single sign-on
- Certification and compliance training

BD plan summary

- **ICP:** Corporate L&D teams, universities, training providers seeking scalable digital learning and measurable outcomes.
- **Top offers:** 30-day LMS trial with analytics; pilot cohort with blended learning; certification program build.
- **Sales plays:** Pilot cohort → demonstrate engagement uplift → enterprise license + content services.
- **KPIs:** Trial conversion rate 40%; average contract value; learner engagement metrics.

Sample BD job descriptions

- **Head of BD Learning:** Partnerships with content providers and enterprises. KPI: enterprise deals, content partnerships.
- **AE Learning:** Sell LMS and services. KPI: quota.
- **Learning Solutions Architect:** Design integrations and learning journeys. KPI: pilot success.
- **Partner Manager:** Content and academic partners. KPI: partner content revenue.
- **CSM:** Learner adoption and outcomes. KPI: engagement, renewal.

Discovery script

- **Executive (20 min):** L&D priorities, learner targets, current LMS, KPIs for completion and skill uplift.
- **Technical (45 min):** current HRIS/LMS stack, SSO, content formats, reporting needs, sample learner cohorts.

Pilot template

- **Title:** 30-Day Cohort Pilot with Analytics
- **Objective:** Demonstrate X% increase in completion and Y% improvement in assessed skills.

- **Scope:** 1 cohort of N learners, blended content, LMS setup, analytics dashboard.
- **Success criteria:** Completion rate $\geq X\%$; assessment score uplift $\geq Y\%$.
- **Timeline:** Week 0 kickoff → Week 1 setup → Week 2 delivery → Week 3 monitoring → Week 4 evaluation.
- **Commercials:** Pilot fee or discounted first year with conversion credit.

Negotiation checklist

- Data privacy for learner data and compliance with local regulations.
- Content licensing and IP rights.
- Integration SLAs for HRIS and SSO.
- Pricing: per-learner, per-seat, or enterprise license.
- Support, training, and renewal terms.

+++++

Templates and Best Practices

Standard Pilot SOW Elements

Objective, scope, data requirements, roles, timeline, deliverables, success criteria, acceptance, fees, conversion terms.

Universal Discovery Best Practices

Start with business outcomes, quantify impact, map stakeholders, confirm data access early, define acceptance criteria.

Negotiation Universal Checklist

Confirm objectives and KPIs;
data protection and compliance;
pricing and pilot conversion;
SLAs and support;
IP and licensing;
exit and migration.
