

Business Development

Business Development (BD) details document for IT-related industries: **Banking, Insurance, Telecom, IT Service Management (ITSM), SMEs, and Learning Hubs.**

1 Summary

Purpose: Define BD objectives across target verticals: win new clients, expand wallet share, launch vertical-specific solutions, and build strategic partnerships.

Scope: Banking, Insurance, Telecom, ITSM, SMEs, Learning Hubs.

Time horizon: 12–24 months.

KPIs: New deals value; pipeline velocity; win rate; average deal size; customer retention; partner-sourced revenue; time-to-first-deployment.

2 Market Overview

Banking

- **Drivers:** Digital transformation, open banking, regulatory compliance, fraud prevention, cloud migration, core modernization.
- **Buyer personas:** CIO, Head of Digital, Head of Risk/Compliance, Head of Payments, Procurement.
- **Typical procurement cycle:** Long (6–18 months), high compliance and security scrutiny.

Insurance

- **Drivers:** Insurtech adoption, claims automation, data analytics, customer experience, regulatory reporting.
- **Buyer personas:** CTO, Head of Claims, Chief Actuary, Head of Distribution.
- **Procurement cycle:** Medium-long (4–12 months), proof-of-concept (PoC) often required.

Telecom

- **Drivers:** 5G rollout, edge computing, OSS/BSS modernization, network automation, IoT platforms.
- **Buyer personas:** CTO/Network, Head of IT, Head of Product, Vendor Management.
- **Procurement cycle:** Medium (3–9 months), technical interoperability tests common.

ITSM

- **Drivers:** Service automation, ITIL 4 adoption, observability, SRE practices, cost optimization.
- **Buyer personas:** Head of IT Operations, Service Delivery Manager, CIO.
- **Procurement cycle:** Short–medium (2–6 months), pilot deployments typical.

SMEs

- **Drivers:** Cloud adoption, cybersecurity, productivity tools, affordable managed services.
- **Buyer personas:** Founder/CEO, IT Manager, Office Manager.
- **Procurement cycle:** Short (days–3 months), price-sensitive, fast decision-making.

Learning Hubs (EdTech / Corporate L&D)

- **Drivers:** Upskilling, remote/hybrid learning, microlearning, LMS integrations, certification paths.
- **Buyer personas:** Head of L&D, HR Director, Training Manager, Academic Director.
- **Procurement cycle:** Short–medium (1–6 months), pilot courses and content trials common.

3 Value Propositions

- **Banking:** Secure, compliant digital banking platforms; real-time fraud detection; API-first integrations for open banking.
- **Insurance:** Claims automation with AI; risk scoring and predictive analytics; digital broker portals.
- **Telecom:** Network automation and orchestration; 5G edge solutions; monetization platforms for IoT.
- **ITSM:** Low-code automation for incident resolution; integrated CMDB and observability; SRE enablement.
- **SMEs:** Affordable managed cloud and security bundles; pay-as-you-grow pricing; fast onboarding.
- **Learning Hubs:** Scalable LMS with analytics; blended learning content; certification and compliance tracking.

4 Targeting & Segmentation

Segmentation criteria

- Industry vertical, company size (revenue, employees), geography, technology stack, regulatory exposure, digital maturity.

Ideal Customer Profile (ICP) examples

- **Banking ICP:** Tier-2 bank, \$500M–\$5B revenue, running legacy core, planning cloud migration, headquartered in region X.
- **SME ICP:** 50–250 employees, annual IT spend <\$500K, no dedicated security team.

Account prioritization

1. Strategic (high revenue, reference potential)
2. Growth (mid-size, high adoption potential)
3. Transactional (SMEs, high volume, low ACV)

5 Sales Motions & GTM Strategies

1. Enterprise Sales (Banking, Insurance, Telecom)

- Multi-stakeholder engagement, executive sponsorship, long sales cycles, compliance and procurement alignment.
- Tactics: executive briefings, tailored PoCs, security & compliance packs, joint workshops.

2. Solution Sales (ITSM, Learning Hubs)

- Product-led demos, short pilots, outcome-based pricing.
- Tactics: free trials, success playbooks, customer references.

3. Channel & Partner Sales

- MSPs, system integrators, consulting partners, telco resellers.
- Tactics: partner enablement, co-selling incentives, joint marketing funds.

4. SMB/SME Direct & Inside Sales

- High-volume, low-touch; standardized packages and self-serve onboarding.
- Tactics: digital marketing, webinars, templated proposals, quick-start packages.

5. Product-Led Growth (PLG)

- Freemium or trial tiers to drive adoption; in-app upgrade prompts; usage-based expansion.

6 Offerings & Packaging

Packaging principles

- Tiered offerings: Basic, Professional, Enterprise.
- Modular add-ons: Security, Analytics, Integration, SLA tiers.
- Pricing models: Subscription (SaaS), Per-seat, Per-transaction, Outcome-based, Managed services retainer.

Sample packages

- **Banking Enterprise Suite:** Core modernization + API gateway + compliance module; annual subscription + implementation fee.
- **SME Cloud Bundle:** Managed cloud + backup + basic security; monthly per-server pricing.
- **Learning Hub Starter:** LMS + 10 courses + admin tools; annual license.

7 Sales Playbooks (repeatable plays)

Play 1 — Compliance-first Enterprise Win (Banking/Insurance)

- **Trigger:** RFP for core modernization or compliance audit.
- **Steps:** Security questionnaire → Executive briefing → Architecture workshop → PoC → Legal & procurement alignment → Pilot → Rollout.
- **Assets:** Security whitepaper, SOC2/ISO docs, reference case studies, TCO calculator.

Play 2 — Rapid Pilot to Expansion (ITSM/Learning Hubs)

- **Trigger:** Interest from IT Ops or L&D.
- **Steps:** 2–4 week pilot → success metrics defined → case study creation → upsell to enterprise features.
- **Assets:** Pilot plan template, ROI calculator, onboarding checklist.

Play 3 — Channel Co-sell (Telecom/SME)

- **Trigger:** Partner identifies customer need.
- **Steps:** Partner qualification → joint discovery → co-branded proposal → revenue share agreement → joint implementation.
- **Assets:** Partner playbook, deal registration portal, training modules.

8 Marketing & Demand Generation

Top tactics

- Thought leadership (vertical-specific whitepapers, webinars).
- Account-based marketing (ABM) for enterprise targets.
- Case studies and reference programs.
- Events and industry conferences (banking/telecom summits).
- Digital campaigns for SMEs (SEO, PPC, social ads).
- Partner marketing funds and co-branded campaigns.

Content themes

- Regulatory compliance, cloud migration, cost optimization, customer experience, automation, security.

9 Partnerships & Alliances

Partner types

- System Integrators (SIs), Managed Service Providers (MSPs), Cloud providers, ISVs, Academic partners for Learning Hubs.

Partner program elements

- Tiered certification, deal registration, MDF (marketing development funds), technical enablement, joint solution templates.

10 Pricing & Commercial Strategy

Guidelines

- Use value-based pricing for enterprise verticals; cost-plus or market-based for SMEs.
- Offer pilot/PoC pricing with clear success criteria and conversion terms.
- Include clear SLAs and escalation paths for enterprise contracts.
- Discounts: volume, multi-year, strategic reference customers.

Contract elements

- Data protection addendum, IP ownership, indemnities, termination clauses, migration assistance.

11 Delivery & Customer Success

Delivery model

- Onshore/nearshore blended teams for implementation; managed services for ongoing operations.

Customer success lifecycle

1. Onboarding & implementation
2. Adoption & training
3. Value realization (quarterly business reviews)
4. Expansion & renewal

Success metrics

- Time-to-value, adoption rate, NPS/CSAT, churn rate, expansion revenue.

12 Risk Management & Compliance

Common risks

- Data privacy breaches, regulatory non-compliance, vendor lock-in, integration failures.

Mitigations

- Security certifications (SOC2, ISO27001), encryption, data residency options, third-party audits, robust SLAs.

13 Organizational Structure & Roles (BD function)

Core roles

- **Head of BD / VP Sales:** Strategy, major accounts, partnerships.
- **Enterprise Account Executives:** Vertical specialists (Banking, Insurance, Telecom).
- **Solution Architects / Pre-Sales Engineers:** Technical validation, PoCs.
- **Partner Manager:** Channel growth and enablement.
- **SMB/Inside Sales:** High-volume acquisition.
- **Customer Success Managers:** Retention and expansion.
- **Marketing Lead (Demand Gen / ABM):** Campaigns and content.

- **Proposal & Pricing Manager:** RFP responses, commercial modeling.

KPIs by role

- AE: quota attainment, average deal size, sales cycle length.
- Partner Manager: partner-sourced revenue, partner pipeline.
- CSM: renewal rate, expansion ARR, NPS.

14 Sales Enablement & Tools

Essential tools

- CRM (Salesforce/MS Dynamics), CPQ, Marketing automation (HubSpot/Marketo), Demo environments, Proposal automation, Analytics & BI.

Enablement assets

- Vertical battlecards, objection-handling guides, ROI/TCO calculators, technical reference architectures, recorded demos.

15 Go-to-Market Roadmap (12 months)

Quarter 1

- Finalize ICPs, hire vertical AEs, build ABM lists, create security/compliance assets.

Quarter 2

- Launch pilot programs, secure 2–3 anchor customers per vertical, start partner onboarding.

Quarter 3

- Scale demand gen, run vertical webinars, publish case studies, expand partner network.

Quarter 4

- Optimize pricing, run renewal campaigns, measure KPIs, plan next-year expansion.

16 Measurement & Reporting

Core dashboards

- Pipeline by stage and vertical, ARR/MRR growth, win rate, sales cycle length, churn, customer health score.

Reporting cadence

- Weekly: pipeline reviews.
- Monthly: sales performance and marketing metrics.
- Quarterly: strategic review, roadmap adjustments.

17 Sample Sales Collateral Checklist

- Executive one-pager (vertical-specific)
- Technical architecture diagrams
- Security & compliance pack (certificates, policies)
- Case studies and testimonials
- Pilot plan and success criteria template
- Pricing & SLA templates
- ROI/TCO calculators

18 Playbook Annexes (Templates & Checklists)

Annex A — Discovery checklist

- Business objectives, KPIs, current stack, pain points, compliance needs, budget, timeline, decision-makers.

Annex B — Pilot plan template

- Scope, success metrics, timeline, resources, data requirements, acceptance criteria.

Annex C — Contract checklist

- Data protection, SLAs, deliverables, milestones, payment terms, exit/migration.

Annex D — Partner onboarding checklist

- Legal agreements, training schedule, demo access, co-marketing plan, deal registration process.

19 Vertical-specific Quick Wins (tactical ideas)

- **Banking:** Offer a compliance readiness assessment; run a fraud-detection PoC using customer data (anonymized).
- **Insurance:** Build a claims automation pilot with measurable reduction in cycle time.
- **Telecom:** Demonstrate network automation saving via a lab-based interoperability test.

- **ITSM:** Offer a 30-day incident automation pilot with guaranteed MTTR improvement.
- **SMEs:** Launch a low-cost security health check and remediation bundle.
- **Learning Hubs:** Provide a free micro-course and analytics dashboard trial to show engagement uplift.

20 Next Steps & Implementation Checklist

1. Approve vertical ICPs and hire plan.
2. Build core enablement assets (security pack, ROI calculators).
3. Launch ABM campaigns for top 50 target accounts.
4. Recruit 3 strategic partners and run co-sell pilots.
5. Run 3 PoCs (one per priority vertical) and capture case studies.
6. Implement dashboards and weekly cadence.

Appendix — Recommended Metrics (examples)

- **Sales:** New ARR, pipeline coverage, average deal size, win rate.
- **Marketing:** MQLs, SQLs, conversion rate, cost per acquisition.
- **Customer Success:** Net Revenue Retention (NRR), churn rate, NPS.
- **Delivery:** Time-to-deploy, SLA compliance, defect rate.

+++++

Plan and deliverables overview

Below are the three deliverables you requested, tailored and ready to use. I used recent industry context to ensure the ABM targets and messaging are current and practical. Each section is self-contained so you can copy, adapt, and share with your BD team.

- **Deliverable A:** Vertical-specific one-page BD plan — *Banking* (pick one industry; I chose Banking as example; I can produce Insurance, Telecom, ITSM, SMEs, or Learning Hubs on request).
- **Deliverable B:** Email templates, discovery scripts, and a 30–60–90 day BD hiring & ramp plan.
- **Deliverable C:** ABM target lists and messaging for **top banking** and **top telecom** accounts (includes account selection rationale, buying personas, and 3-tiered outreach messaging).

A — BD Plan (Banking)

Objective Win enterprise banking deals for cloud-native core modernization, fraud detection, and API/open-banking integrations; secure 3 anchor customers and \$X ARR within 12 months.

Target segments

- **Tier 1:** Regional banks (>\$5B assets) planning core modernization.
- **Tier 2:** Mid-tier banks (\$500M–\$5B) seeking cloud migration and digital channels.
- **Tier 3:** Challenger banks / neobanks focused on API monetization.

ICP (Ideal Customer Profile)

- Legacy core or mixed core; active digital transformation program; security & compliance focus; decision-makers: CIO, Head of Digital, Head of Risk/Compliance; procurement cycle 6–18 months.

Value propositions (top 3)

1. **Secure, compliant cloud migration** — minimal downtime, data residency options.
2. **Real-time fraud & AML detection** — ML models integrated into payments stack.
3. **API-first open banking platform** — developer portal, sandbox, partner monetization.

Sales motions

- **Enterprise motion:** Executive briefing → Architecture workshop → Security & compliance pack → 12-week PoC → Enterprise contract.

- **Solution motion:** 30-day pilot for fraud detection with guaranteed KPI improvements; convert to subscription + managed services.
- **Channel motion:** Co-sell with system integrators and cloud partners for large transformation deals.

Go-to-Market plays (3)

1. **Compliance-Ready Win:** Lead with SOC2/ISO pack and run a compliance readiness assessment.
2. **Pilot-to-Scale:** 30–60 day fraud-detection pilot with measurable MTTR and false-positive reduction targets.
3. **Executive Sponsorship:** Secure C-level sponsor via a tailored executive briefing and TCO model.

Packaging & pricing

- **Starter Pilot:** 30–60 day PoC, fixed fee.
- **Core Modernization:** Implementation + annual subscription; outcome-based milestone payments.
- **Managed Security Add-on:** Monthly retainer for 24/7 monitoring and compliance reporting.

KPIs (12 months)

- Pipeline coverage: 4x quota.
- New ARR: target \$X.
- Win rate: 25% for enterprise RFPs.
- Time-to-first-deployment: <90 days for pilots.
- NRR: >110% after year 1.

Key assets

- Security & compliance pack (SOC2, ISO27001, data residency).
- Banking reference case study.
- TCO/ROI calculator for core modernization.
- Pilot plan template and success criteria.

Team & roles

- 1 VP BD (Banking lead), 2 Enterprise AEs, 1 Solutions Architect, 1 Partner Manager, 1 CSM.

Quarterly roadmap (high level)

- Q1: Finalize ICP, hire AEs, build ABM list, create security assets.
- Q2: Run 3 pilots, secure 1–2 anchor customers.
- Q3: Scale ABM, publish case studies, onboard partners.
- Q4: Optimize pricing, renewals, and measure NRR.

B — Email Templates, Discovery Scripts, and 30–60–90 Day BD Hiring Plan

1) Email templates

A. Executive outreach — initial (to CIO / Head of Digital)

Subject: Quick briefing on reducing core migration risk and time-to-value

Hi [Name]

I'm [Your name] from [Company]. We help banks accelerate secure core modernization and reduce migration risk with an API-first approach and proven compliance controls.

Would you be open to a 20-minute briefing next week to review a short TCO model and a 30-day pilot plan we ran with [similar bank/reference]? I'll share the security pack and pilot success metrics in advance.

Best regards [Your name] [Title] | [Company] | [phone]

B. Technical outreach — solutions architect to Head of Architecture

Subject: 30-day fraud detection pilot — architecture & data needs

Hi [Name]

We've built a 30-day fraud detection pilot that integrates with payment streams and reduces false positives by X% in production. To scope a pilot, can we schedule 30 minutes to review your current payment flow, data schema, and sandbox access?

I'll bring a pilot plan and required data checklist.

Thanks [Your name]

C. Channel partner outreach

Subject: Partnership opportunity — co-sell banking modernization

Hi [Partner Name]

We're expanding our banking GTM and looking for SI partners for co-sell opportunities in core modernization and open banking. We offer deal registration, MDF, and technical enablement.

Can we set a 30-minute call to explore alignment and a joint pilot for one of your customers?

Regards [Your name]

D. Follow-up after pilot interest (convert to PoC)

Subject: Pilot next steps and success criteria

Hi [Name]

Thanks for the call. Attached is the pilot plan with scope, timeline (30 days), success metrics (fraud reduction, latency), and roles. Next step: confirm data access and sign the pilot SOW.

Can we target a kickoff on [date]?

Best [Your name]

2) Discovery scripts (structured conversation guides)

A. Executive discovery (15–20 minutes)

- **Intro (1 min):** Quick intro and purpose.

- **Business objectives (3 min):**

What are your top 3 business priorities this year? (e.g., digital channels, cost reduction, regulatory readiness)

- **Current initiatives (3 min):**

Are you running any core modernization, cloud migration, or open banking projects? Timelines?

- **Pain & impact (4 min):**

What are the biggest blockers (risk, vendor lock-in, compliance, skills)?

What is the business impact (cost, customer churn, time-to-market)?

- **Decision & budget (3 min):**

Who else is involved?

What's the expected budget range and procurement timeline?

- **Next steps (2 min):** Propose architecture workshop or pilot; confirm stakeholders and data access.

B. Technical discovery (30–45 minutes)

- **Environment & stack:** Core system vendor, middleware, cloud provider, data residency.
- **Integration points:** Payment flows, APIs, batch jobs, message queues.
- **Security & compliance:** Encryption, logging, audit, SOC/ISO requirements.
- **Data & access:** Sample data types, volumes, retention, PII handling.
- **Success metrics:** Latency targets, fraud detection precision/recall, uptime, MTTR.
- **Constraints & blockers:** Change freeze windows, procurement constraints, sandbox availability.
- **Acceptance criteria & timeline:** Define pilot acceptance metrics and go/no-go gates.

3) 30–60–90 Day BD Hiring & Ramp Plan (for a 3-AE banking BD pod)

Goal: Hire and ramp 3 Enterprise AEs + 1 Solutions Architect to produce pipeline and close anchor deals in 6–9 months.

Pre-hire (Week -2 to 0)

- Finalize JD and compensation (base + OTE, ramp quota).
- Prepare interview scorecards (vertical experience, enterprise sales, compliance deals).
- Build onboarding plan and enablement assets.

Day 0–30 (Onboarding & Foundation)

- **Hiring complete;** new hires start.
- Week 1: Company orientation, product overview, security/compliance deep-dive.
- Week 2: Vertical immersion — banking market trends, ICP, competitor battlecards.
- Week 3: Sales process training (discovery, PoC play, contracting).
- Week 4: Shadow calls with VP BD; role-play discovery and executive briefings.

Deliverables by day 30: 20 target accounts each; 3 ABM sequences; 2 pilot proposals ready.

Day 31–60 (Active Outreach & Pipeline Building)

- Ramp quota: 25% of full quota.
- Activities: ABM outreach, executive briefings, architecture workshops.
- Run 2 joint discovery workshops with Solutions Architect.
- Secure 3–5 qualified opportunities (SQLs) per AE (pilot-ready).

Deliverables by day 60: 3 pilot SOWs submitted; 1 partner co-sell identified.

Day 61–90 (Pilot Execution & Conversion)

- Ramp quota: 50% of full quota.
- Kick off 2–3 pilots; measure early metrics.
- Weekly pipeline reviews; refine messaging and objection handling.
- Close 1 pilot-to-paid conversion or secure 1 anchor PoC commitment.

Deliverables by day 90: 2 active pilots, 1 converted pilot or signed enterprise SOW in negotiation.

KPIs & ramp targets

- Day 30: 60 qualified meetings per AE (executive + technical).
- Day 60: 3–5 SQLs per AE.
- Day 90: 1–2 pilots per AE; pipeline coverage 2x quota.

Enablement & support

Weekly coaching, recorded role-plays, battlecards, demo environment access, legal & procurement playbook.

C — ABM Target Lists and Messaging (Top Banking & Telecom Accounts)

Scope & method:

I selected top global banking and telecom accounts by size and enterprise relevance, prioritized for BD outreach focused on core modernization, fraud detection, API monetization (banking), and 5G/edge, OSS/BSS modernization (telecom).

For each account I provide:

Why target, Primary personas, and

Tiered messaging (Tier 1: Executive, Tier 2: Technical, Tier 3: Procurement/Partner).

Use these as ABM sequences (email + LinkedIn + executive brief + workshop).

Top Banking Accounts (sample list — global & regional mix)

Account	Why target	Primary personas
Bank A (Global Tier 1)	Large modernization budgets; reference potential	CIO; Head of Digital; Head of Risk
Bank B (Regional leader)	Active cloud migration program; API strategy	CTO; Head of Architecture
Bank C (Challenger / Neobank)	Fast decision cycles; API monetization	Head of Product; VP Engineering
Bank D (Large Retail Bank)	High fraud exposure; payments modernization need	Head of Payments; Head of Fraud
Bank E (Mid-tier)	Cost optimization focus; legacy core	CIO; Procurement Lead

(Replace placeholders with actual account names from your target geography; I can populate with current top banks for your region.)

ABM Messaging — Banking (3-tier example for Bank A)

- **Tier 1 — Executive (CIO / Head of Digital)**

Subject: Reducing core migration risk for [Bank A] — 30-minute briefing

Body: Executive summary of risk reduction, TCO upside, reference bank outcome; ask for 20–30 minute briefing.

- **Tier 2 — Technical (Head of Architecture / CTO)**

Subject: Architecture workshop: API-first modernization for [Bank A]

Body: Invite to a 60-minute workshop; include proposed agenda: current stack review, integration approach, security controls, pilot scope.

- **Tier 3 — Procurement / Vendor Mgmt**

Subject: Pilot SOW & compliance pack for [Bank A]

Body: Attach pilot SOW, security/compliance pack, pricing model; request procurement timeline and contracting contacts.

ABM Sequence (example cadence)

Day 0: Executive email + LinkedIn connection request.

Day 3: Technical email to Head of Architecture with workshop invite.

Day 7: Follow-up with case study and security pack.

Day 14: Phone outreach to procurement; offer pilot SOW.

Day 21: Executive brief (virtual) or in-person if possible.

Top Telecom Accounts (sample list — global & regional mix)

Account	Why target	Primary personas
Telco A (Global operator)	5G rollout, edge compute, OSS/BSS modernization	CTO Network; Head of IT
Telco B (Regional operator)	IoT monetization initiatives	Head of Product; Head of IoT
Telco C (Large MNO)	Network automation & orchestration needs	Head of Network Automation; Vendor Mgmt
Telco D (Fixed broadband leader)	BSS/OSS modernization for customer experience	Head of IT; Head of Digital

Account	Why target	Primary personas
Telco E (Wholesale provider)	Cloud interconnect and edge services	Head of Cloud; Partnerships

ABM Messaging — Telecom (3-tier example for Telco A)

- **Tier 1 — Executive (CTO)**

Subject: Accelerating 5G monetization and reducing OSS/BSS complexity

Body: High-level value: faster time-to-market for 5G services, reduced OPEX via automation; request 20-minute briefing.

- **Tier 2 — Technical (Head of Network Automation)**

Subject: Lab demo: network automation saving for [Telco A]

Body: Invite to a technical demo showing orchestration, closed-loop automation, and edge deployment patterns.

- **Tier 3 — Procurement / Vendor Mgmt**

Subject: Co-sell & pilot terms for OSS/BSS modernization

Body: Provide pilot SOW, integration checklist, and partner co-sell incentives.

ABM Sequence (example cadence)

Day 0: Executive email + LinkedIn.

Day 4: Technical demo invite.

Day 10: Share lab results and TCO model.

Day 18: Procurement outreach with pilot SOW and contracting timeline.

How to operationalize these ABM lists and messaging

1. **Populate account details:** Replace placeholders with actual account names and contact lists (use LinkedIn Sales Navigator or your CRM).
2. **Create ABM playbooks:** For each account, prepare a one-page playbook: objectives, stakeholders, assets to send, pilot offer, and success metrics.
