

Scenarios for a banking environment

There are three modular, practice-ready CRM system scenarios tailored for a banking environment—each designed to spark strategic thinking, stakeholder empathy, and ethical reflection.

Scenario 1: "Retail Banking CRM Overhaul"

Project Goal

Modernize the CRM system to unify customer profiles across savings, loans, and credit card services—enabling personalized offers and proactive service.

Key Details

Timeline : 16 weeks

Budget : \$250,000

Stakeholders : Branch staff, marketing team, compliance officers, customers

Challenges:

- Legacy systems with siloed data
- Need for multilingual support (e.g., Burmese, English)
- Regulatory constraints on data usage
- Low digital literacy among some customer segments

Student Tasks

- Map customer journey across banking products
- Design a stakeholder training plan with celebration milestones
- Identify risks (e.g., data privacy, adoption) and mitigation strategies
- Draft KPIs: cross-sell rate, customer satisfaction, service response time
- Propose symbolic recognition for staff CRM champions

Scenario 2: "CRM for SME Banking Division"

Project Goal

Implement a CRM system to support relationship managers handling small and medium enterprise (SME) clients—focusing on loan tracking, onboarding, and personalized financial advice.

Key Details

Timeline : 10 weeks

Budget : \$180,000

Stakeholders : SME clients, relationship managers, credit analysts, legal team

Challenges:

- Complex client portfolios
- Need for secure document exchange
- Multilingual onboarding for diverse business owners
- Ethical concerns around automated loan recommendations

Student Tasks

- Create a modular WBS for CRM rollout
- Design a multilingual onboarding guide for SME clients
- Draft a stakeholder engagement plan with symbolic badges (e.g., “SME Ally”)
- Identify ethical dilemmas in automated financial advice
- Propose feedback loops for continuous CRM improvement

Scenario 3: "Mobile CRM for Digital-First Banking"

Project Goal

Launch a mobile-first CRM system to support digital banking customers—integrating chat support, AI-driven insights, and loyalty rewards.

Key Details

Timeline : 8 weeks

Budget : \$100,000

Stakeholders : App users, digital support agents, UX designers, data analysts

Challenges:

- High expectations for instant service
- Need for inclusive UX across devices
- Balancing personalization with privacy
- Celebrating customer milestones digitally

Student Tasks

- Design a Gantt chart for mobile CRM rollout
- Propose symbolic digital assets for customer milestones (e.g., “Savings Star”)
- Identify risks in AI-driven personalization
- Draft KPIs: app engagement, support resolution time, loyalty program uptake
- Create a celebration-ready launch plan with branded visuals

Best Practice Answers

— Best-practice answers for each student task across the three CRM scenarios for banking. These are crafted to model strategic clarity, ethical foresight, and celebration-ready.

Scenario 1: Retail Banking CRM Overhaul

Task 1 : Map Customer Journey

- Entry points** : branch visit, mobile app, website
- Key touchpoints** : account opening, loan inquiry, credit card offers
- Pain points** : duplicate data entry, inconsistent service
- Opportunities** : personalized offers, multilingual support, milestone recognition

Task 2 : Stakeholder Training Plan

Role-based modules for branch staff, marketers, and compliance officers

Bilingual guides (English & Burmese) with visual metaphors

Symbolic badges : “Trust Builder,” “Service Champion”

Celebration : CRM launch day with branded visuals and recognition wall

Task 3 : Risk & Mitigation

Risk	Mitigation
Data fragmentation	Use ETL tools and phased migration
Privacy breaches	Implement role-based access and encryption
Staff resistance	Offer incentives and symbolic recognition
Regulatory non-compliance	Align CRM workflows with local banking laws

Task 4 : KPIs

- Customer satisfaction score (CSAT)
- Cross-sell rate (e.g., savings + credit card)
- Service response time
- CRM adoption rate among staff
- Multilingual support ticket resolution

Task 5 : Symbolic Recognition

- “Customer Loyalty Architect” for strategic designers
- “Trust Builder” for compliance-aligned service agents
- “Milestone Maven” for staff who celebrate customer journeys

Scenario 2 : SME Banking CRM

Task 1 : Modular WBS

Planning : stakeholder interviews, CRM selection

Design : SME dashboard, document exchange portal

Development : loan tracking, multilingual onboarding

Testing : pilot with 5 SME clients

Deployment : staff training, go-live

Feedback : client surveys, iterative updates

Task 2 : Multilingual Onboarding Guide

Burmese, English, Thai versions

Step-by-step visuals for loan tracking and document upload

Symbolic prompts : “Your growth journey starts here”

Celebration visuals for first successful CRM use

Task 3 : Stakeholder Engagement

Relationship managers : CRM training + “SME Ally” badge

Credit analysts : workflow integration

Legal team : compliance mapping

SME clients : onboarding support + feedback loop

Task 4 : Ethical Dilemmas

Bias in automated loan recommendations

Transparency in scoring algorithms

Consent for data usage

Mitigation : human-in-the-loop review, clear disclosures

Task 5 : Feedback Loops

- Post-onboarding surveys
- Monthly SME roundtables
- CRM dashboard with sentiment tracking
- Iterative updates based on client feedback

Scenario 3 : Mobile CRM for Digital Banking

Task 1 : Gantt Chart Milestones

Week	Milestone
1–2	UX design & chatbot scripting
3–4	CRM integration with mobile app
5	Internal testing
6	Pilot launch
7	Full deployment
8	Feedback & optimization

Task 2 : Symbolic Digital Assets

- “Savings Star” badge for milestone deposits
- “Digital Navigator” for app mastery
- Celebration visuals: animated journey maps, personalized messages

Task 3 : AI Personalization Risks

- Over-targeting or intrusive recommendations
- Data misuse or profiling
- **Mitigation:** opt-in personalization, transparent settings, ethical AI review

Task 4 : KPIs

- App engagement rate

- Chat support resolution time
- Loyalty program uptake
- Customer retention
- Sentiment score from feedback

Task 5 : Launch Celebration Plan

- Countdown visuals in app
- Staff recognition wall (“Digital Champions”)
- Customer milestone badges
- Bilingual launch video with symbolic storytelling
