

Type of Business Analyst (BA)

— showing their focus, responsibilities, and how they contribute to organizational success.

Strategic BA

A Strategic BA operates at the **executive and organizational level**, ensuring that business initiatives align with long-term goals and corporate vision.

- ▶ **Focus** : Market positioning, competitive analysis, mergers, acquisitions, and transformation programs.
- ▶ **Contribution** : Provides insights to leadership, ensures projects deliver strategic value, and supports decision-making at the highest level.

Systems BA

A Systems BA bridges the gap between **business requirements and IT systems**. They translate business needs into technical specifications for developers and architects.

- ▶ **Focus** : ERP, CRM, enterprise applications, and system integrations.
- ▶ **Contribution** : Ensures IT solutions meet business needs, validates system functionality, and supports technical teams during implementation.

Process BA

A Process BA specializes in **workflow optimization and operational efficiency**.

They analyze existing processes and recommend improvements.

- ▶ **Focus** : Lean, Six Sigma, automation, and process re-engineering.
- ▶ **Contribution** : Reduces inefficiencies, improves productivity, and supports change management initiatives.

Data BA

A Data BA focuses on **data analysis and business intelligence** to support evidence-based decision-making.

- **Focus** : Dashboards, KPIs, predictive analytics, and reporting.
- **Contribution** : Provides actionable insights, supports forecasting, and helps organizations leverage data for strategic advantage.

Product BA

A Product BA works closely with **product development teams** to define requirements, user stories, and acceptance criteria.

- **Focus** : Agile product development, backlog management, customer experience.
- **Contribution** : Ensures product features align with customer needs, collaborates with Product Managers, and drives customer-centric innovation.

<u>Type</u>	<u>Description</u>	<u>Focus Area</u>	<u>Contribution</u>
